PROFESSIONAL SUMMARY

Full Stack Developer with production experience across React Native, Next.js, .NET, and Salesforce, building enterprise systems used by 3,000+ users across leading Fast-Moving Consumer Goods (FMCG), consumer-electronics and industrial brands. Build business modules for Xmatix, DealerMatix's multi-tenant platform, across Next.js, Expo and .NET, using AI-assisted engineering workflows (Claude) to ship faster. Strong foundation in Apex, LWC, REST/SOAP integrations, and cross-platform mobile development for iOS and Android.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C#, Apex, Python, C, C++

Frameworks & Libraries: React Native, Next.js, .NET Core, Lightning Web Components (LWC), TensorFlow/Keras

Databases: MySQL, PostgreSQL, Prisma

Cloud & Integration: AWS (EC2, S3, IAM basics), MuleSoft, REST/SOAP APIs, Postman

Salesforce Ecosystem: Apex, LWC, Salesforce Flows, AppExchange

Mobile Development: React Native, Expo, Xcode, iOS/Android Build & Deployment

AI-Assisted Engineering: Claude, GitHub Copilot

Tools & Practices: Git/GitHub, Figma (design handoff), Agile/Scrum, Monorepo Architecture

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS

PROFESSIONAL EXPERIENCE

DealerMatix Technologies Pvt Ltd

Pune, India

Software Engineer

July 2025 – Present

- Converted to full-time after a 6-month internship; embedded in a 6–8 member React Native team building DealerMatix DMS, a multi-tenant field sales app now in production for four FMCG and consumer brands, serving 3,000+ daily users including a global engineering manufacturer as flagship partner.
- Own production features including gamification & incentive schemes, merchandising, expense management, order taking, visit planning, GPS-based geolocation tracking, and selfie-based check-in verification, integrated with a Salesforce Apex backend.
- Joined Xmatix, the company's multi-tenant business platform, in October 2025: 360+ commits across the Next.js web app, the Expo mobile app and the .NET domain layer (items, SKUs, tax).
- Adopted AI-assisted engineering workflows using Claude starting February 2026 to accelerate development; Xmatix is now live in production across 3+ enterprise clients, with active scaling underway.
- Currently building reusable, schema-driven UI components in Next.js for cross-industry business workflows, translating Figma designs from the product design team into production code.
- Integrate third-party systems via MuleSoft and validate APIs using Postman; consistently deliver ahead of sprint timelines.

Software Engineer Intern

Jan 2025 – July 2025

- Achieved 90%+ Apex code coverage across 250+ classes, helping secure the application's official Salesforce AppExchange listing.
- Built Lightning Web Components (LWC) for multiple client-facing modules, including a consumer-electronics brand's invoice generation system.
- Engineered REST/SOAP API integrations to synchronize Salesforce data with external ERP systems.
- Authored business-specific Salesforce Flows for each client brand to automate high-volume workflows.

PROFESSIONAL PROJECTS

DealerMatix DMS — Multi-Tenant React Native

React Native, Salesforce Apex

Clients: FMCG · Personal Care · Consumer Electronics · Industrial Engineering (flagship partner) — 3,000+ users

- Built a personal-care brand's app frontend from scratch, including client-side logic for incentive calculations and leave management.
- Implemented field-force automation: selfie check-ins and offline-capable GPS location tracking.
- Resolved critical production bugs and improved Team Score performance for the two largest client segments.

Xmatix — Multi-Tenant Business Platform

Next.js, Expo, .NET

- Built web modules: Bank Reconciliation (statement mapping, match panel), Inventory Console, Product Configurator with scheme recommendations, Item 360, Order Allocation with lot allocation, E-Invoice, and GST consoles (GSTR-9C, statement reconciliation).
- Built mobile features in Expo/React Native: a central entity-action dispatcher, inline child-grid editing, barcode scanning with duplicate handling, and offline overlay of pending writes.

AI Mock-Interview Bot

Hackathon Project — Python, ML

- Built an AI-driven interview bot that generated questions, evaluated live coding submissions, and produced automated performance feedback, as part of a national-level college hackathon.

EDUCATION

St. Vincent Pallotti College of Engineering & Technology

Nagpur, India

B.Tech in Computer Engineering — CGPA: 9.35 / 10.0

Aug 2021 – June 2025

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Cloud Fundamentals (AWS)

ACCOMPLISHMENTS

- Publication: Co-authored “Cloud Dynamics Modeling for Meteorological Predictions” (IEEE InGARSS 2025), a spatiotemporal model with 96% prediction accuracy.
- Awards: Highest CGPA in Department (2025 Batch); recipient of the Infocepts “Innovate for Impact” scholarship.
- Leadership: Event Lead, Technex Hackathon — managed technical logistics for 300+ national participants.
